Ridewell Introduces Lightweight Narrow-Top™ Trailer Suspension

Ridewell Suspensions is pleased to announce the RAR-200 Narrow-Top™ trailer suspension in a 23,000 lb. capacity rating. Weighing in at less than 244 pounds, depending on ride height, the Narrow-Top™ is lighter than Ridewell's RideLite® due to its narrow hanger and trailing arm.

The Narrow-Top™ is equipped with the new FiberTech™ bushing at the pivot. Front and rear wings are integral to the hanger and provide lateral stability, easy installation and direct integration to the frame crossmembers.

Additional features of Ridewell's 200NT include:

- Non-captured axle;
- Pre-located height control valve mounting;
- Patented contoured axle seat;
- Axle alignment adjustment capacity $\pm 1/4$ " at the hanger; and
- Mounting heights from 14" to 17".

The Narrow-Top™ suspension is designed for tanker, flatbed, grain, container chassis and bottom dump trailers.

200NT

Ridewell manufactures suspensions for the truck, trailer, bus and recreational vehicle industries throughout the United States and the world.
