

FOR IMMEDIATE RELEASE:

Ridewell Releases New Series of 245R Suspensions

Springfield, MO – September 29, 2009 – Ridewell is pleased to announce the release of a new series of 245R suspensions created to allow customers to use their axle of choice. The recent release of the new 245R optimized the suspension's structure for use with a 13,200 lb. capacity axle, and the springs were pushed outboard for better load transfer to the beam and axle. However, since 245R customers occasionally use 71.5" track, 25,000 lb. capacity axles, suspensions with beams that narrow the spring centers were needed. These new suspensions narrow the spring centers by 4.25", and the following new series of numbers will replace the old:

<u>New #</u>	<u>Old #</u>	<u>Description</u>
2450041	2450040	RUL-245 11.0" – 13.0" RH 13K Truck
2450051	2450050	RUL-245 12.5" – 15.5" RH 13K Truck
2450101	2450100	RUL-245 LMT 12.5" – 15.5" RH 13K Trailer
2450111	2450100	RUL-245 MMT 15.0" – 18.0" RH 13K Trailer
