Ridewell Suspensions Introduces New FiberTech™ Bushing

Springfield, MO – Ridewell Suspensions, engineers and manufacturers of suspensions for the truck, trailer, bus and recreational vehicle industries, is pleased to introduce its new composite FiberTech™ bushing. The FiberTech™ is the result of more than a year of collaborative development with Ridewell's European custom bushing supplier.

Ridewell's FiberTech™ bushing offers high frictional resistance to bushing slippage after installation, requires low force to install and remove and is exceptionally durable due to a unique bushing and eye interface. The bushing has a self-preserving nature when subjected to radial overloads and is securely retained to the eye without adhesives or clamping.

The FiberTech™ bushing is solidly designed to offer high durability and improved suspension roll stability over "cavity" style bushings. In addition, there is no need to orient the bushing upon installation as is required for cavity bushings.

The new FiberTech™ bushing will be available on several new Ridewell suspensions for a variety of applications and capacities.

For more information on the FiberTech™ bushing, contact Ridewell Corp., P.O. Box 4586, Springfield, MO 65808-4586. PH: 800-641-4122, (417) 833-4565, FAX: (417) 833-4560.
