

# RIDEWELL SUSPENSIONS

The Engineered Suspension Company

## **FOR IMMEDIATE RELEASE:**

### **Ridewell Names New President**

*Springfield, MO – July 18, 2008* – Ridewell Suspensions has tapped John E. Millsap to serve as president. Millsap has been vice president for the past four years and has been with Ridewell nearly 14 years.

He replaces John E. Raidel II who remains CEO. Millsap is only the third president to serve during Ridewell's 41 years in the suspension business.

"It's a great honor for me to serve as president. Ridewell is a very successful company and you don't have to look any farther than the people who work here to see why this company has prospered," said Millsap.

"We will keep the same philosophy that has gotten us this far," Millsap said, "and that is to listen to our customers. They tell you if you're doing things right or if you need to change directions."

Millsap has a Bachelor of Science degree in Business from Missouri State University in Springfield, Missouri.

Ridewell engineers and manufactures suspension systems for the truck, trailer and bus industries. The company has served the transportation industry since 1967, holding more than 30 active patents for exclusive features that provide for low maintenance and superior ride quality.
