NEW PRODUCT RELEASE
FOR IMMEDIATE RELEASE

Ridewell's New Ridelite® Integrated Trailer Suspension

Ridewell Suspensions introduces a new lightweight 25,000 lb. cap. integrated trailer air suspension system. The system was designed for weight-conscious fleets desiring a non-captured axle, an essential feature for ease of service and for the economical preservation of good, working components. Applications include platform, tank, dump, grain, and specialized trailers.

Serviceable features include a proven monopivot bushing that is manually clamped-in with hand tools and a new 1" Speed Set™ alignment system with pivot bolt torque of only 450 ft. lbs. Pre-mounted shock brackets and attachable, no-weld valve mounts assure ease of installation. A patented contoured axle seat optimizes axle weldment by decreasing stress concentrations, no U-bolts required.

The disc brake-compatible Ridelite® is offered with a range of 5" round axles and wheel end equipment to specifications. Bolt-on and weld-on mountings are available.

Ridewell will present the Ridelite® Suspension in June at the International Trucking Show in Las Vegas, Booth 1347. For more information contact Ridewell Corporation, P.O. Box 4586, Springfield, MO 65808. Ph: 800-641-4122, (417) 833- 4565, Fax: (417) 833-4560. www.ridewellcorp.com
