

**FOR IMMEDIATE RELEASE:**

**MORE NEW PRODUCTS!!!** Ridewell continues their busy expansion of product coverage in Canada. Ridewell and TPC International (Edmonton AB) are proud to announce that Ridewell axles are now approved by TPC International to be produced as "TPC ready" for their TIREBOSS™ Tire Pressure Control Systems.

The first ones shall be installed on three axle logging trailers and will be manufactured by Temisko Trailers (Notre-Dame du Nord Qc) for Bourgeois Diesel Service Ltd (Nova Scotia). Robotically integrated Ridewell suspensions and TPC ready axles are standard equipment on trailers offered by Claude Bourgeois.

The TIREBOSS™ Tire Pressure Control system is a computerized device, operated from the cab. This allows the driver to adjust tire pressures while the vehicle is in motion. Each system can be programmed to suit your vehicle configuration and specific haul cycle requirements. All systems come with standard, built-in safety systems and continuous tire pressure monitoring.

Stuck in a rut? TIREBOSS™ Tire Pressure Control can get you out! Demonstrations have proven the effectiveness of reduced tire pressure by providing increased flotation, reduced rutting, less road damage, and improved access to work sites. Roger Cousins of Ken Hardy Trucking testifies, "...I was able to drive in, load up and leave totally unassisted while the trucks with high pressure had to be dragged around."

TIREBOSS™ Tire Pressure Control systems have a reputation for being extremely reliable and low cost to maintain. The systems are transferable from one vehicle to another reducing additional capital expenditure each time the vehicle is replaced. See [www.tireboss.com](http://www.tireboss.com)
