Ridewell's Introduces New High Performance Height Control Valve

Ridewell Suspensions is pleased to introduce its new, improved high performance height control valve for maximum air suspension performance for trucks, trailers, buses and recreational vehicles.

The competitively-priced valve features a minimal deadband for optimal performance in a lightweight, compact and modular package. The valve has all push-to-connect fittings and a universal mounting to work with all applications. Its quick and accurate operation ensures a rapid return to ride height.

Ridewell's height control valve is available in both dump and non-dump configurations.

Ridewell will introduce its new height control valve at the Mid-America Trucking Show in Louisville, KY March 23-25, 2006.
